# RACINE COLLEGE and RAC

**I**N RESPONSE to a demand from graduates of Racine Military Academy, and from graduates of high schools in Racine, Racine College offers a junior college course of two years leading to the degree of Associate in Arts. The course has received the approval of the Committee on Advanced Standing at the University of Wisconsin, which means that credits earned at Racine College will receive the same recognition as those earned at the university itself.

This arrangement has many advantages for residents of Racine and Kenosha, not the least of them being that students may take the first two years of college while they continue to live at home. The economy of this plan is too self-evident to require comment. Another advantage is that classes are small, which permits students to come in close personal contact with their instructors from whom they receive educational guidance based on individual instruction. Because of this close relationship with instructors students are enabled to surmount those difficulties usually encountered in the first years of college courses.

## REQUIREMENTS FOR ADMISSION TO RACINE COLLEGE

Candidates may be admitted as a result of examination, or upon the submission of certificate from an accredited high school showing the completion of fifteen units of high school work. Applicants whose high school credits do not meet the entrance requirements may, at the discretion of the college authorities, make up deficiencies in special classes.

**LOCATION:** The college is beautifully located adjoining the best residential section of the thriving, modern city of Racine on the shore of Lake Michigan. Sixty-five miles north of Chicago and twenty-five south of Milwaukee, Racine is easily reached via the North Shore Electric Line and the Chicago & Northwestern Railroad, as well as by motor.

**CAMPUS:** The campus consists of forty acres, in part beautifully wooded, the balance being devoted to athletic and play fields. There is ample opportunity for all recreation and sports.

**BUILDINGS:** The buildings are of lovely old collegiate Gothic architecture, occupying the south central part of the campus. They are

**PARK-KEMPER HALLS** in which school and class rooms, the dining hall and kitchens, the main offices, band room, armory, and quarters for some of the faculty are located.

**CHAPEL** stands in the middle of the great quadrangle and is a constant inspiration of sacred peace and calm.

**TAYLOR HALL** is the dormitory, the library, and the home of the Dean.

**GYMNASIUM** is new, large, and airy. Thoroughly modern, being lined around the inside wall with cork to a height of six feet. Ample locker and dressing space.

**SWIMMING POOL** adjoins the gymnasium. It is made of white tile and is a constant invitation for swimming.

**RIDING HALL** and **RING**, provided in order that the riding classes may continue during inclement weather indoors, and during good weather outside.

**RIFLE RANGE**, under the gymnasium, equipped to teach the fundamentals of rifle marksmanship and to afford ample opportunity for practice.

**SCHOOL** and **CLASS ROOMS** are well equipped, each class room being furnished with its own library. The Chemistry and Physics Laboratories are second to none.

**LIBRARY** in Taylor Hall is supplied with more than three thousand volumes. The whole arrangement of the library, with its literary atmosphere, is conducive to the development of intellectual interests.
